

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Harmony Portfolios Europe Diversified Fund

A sub-fund of Momentum Global Funds which is an Open Ended Investment Company (OEIC) and UCITS

Class B in Euro

Managed by FundRock Management Company S.A.

ISIN: LU0651984956

Objectives and investment policy

The Fund aims to grow the value of your investment over the long term, whilst minimising the possible reduction in the value of your investment. The Fund will invest globally in a range of other investment funds.

The assets of investee funds will be varied and may include company shares, bonds issued by companies and governments (which are similar to loans that pay a fixed or variable rate of interest), cash and deposits, commodities (wheat, coffee, gold etc.) and other investments. Assets of these other funds will be from around the world and valued in different currencies, although mainly made up of companies in Europe or companies valued in Euro.

Any income generated will be reinvested to grow the value of your investment. You can buy and sell shares on any day that is a business day in Luxembourg and the United Kingdom, and such transactions will be traded on the Fund's next available valuation date.

Holding recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within three years of date of investment.

For full investment objectives and policy details please refer to the Fund's Prospectus, which is available upon request.

Prior to 20th March 2015 the Harmony Portfolios Europe Diversified Fund was known as the Harmony Portfolios Euro Balanced Fund

Risk and reward profile

The Risk and Reward Indicator table demonstrates how the Fund ranks in terms of potential risk and reward. The greater the potential reward, the higher the risk of an investor losing money. This indicator is based on past data which may change over time and may not be a reliable indication of the Fund's future risk profile. The shaded area below shows the Fund's Risk/Reward ranking.

The Fund is ranked four because funds of this type have experienced medium rises and falls in price in the past. Please note that even the lowest risk rated investments may suffer from severe losses in extreme market circumstances.

The indicator does not take into account the following risks of investing in this Fund:

- **Counterparty risk:** The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.
- **Exchange rate risk:** Investing overseas can bring additional returns and spread risk to different markets; however changes in currency rates may cause the value of your investment to decrease.
- **Liquidity risk:** Certain holdings could become hard to value or sell at a desired time and price.
- **Concentration risk:** The Fund could lose money if it has concentrated exposure to an issuer or security that suffers from an adverse event.
- **Derivative risk:** Greater fluctuations in the value of the Fund may be experienced through the use of derivatives by one or more of the underlying investments.

Charges

The charges you pay contribute towards the running cost of the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
