

Harmony Europe Diversified Fund

(Formerly known as the Harmony Euro Balanced Fund)

Fund details

Investment manager: Momentum Global Investment Management	ISIN A Class: LU0651984873	Price per share A Class: EUR 1.1597
Currency: EUR	ISIN B Class: LU0651984956	Price per share B Class: EUR 1.0929
Inception date (fund): 12 August 2011	ISIN C Class: LU0651985094	Price per share C Class: EUR 1.2284
Structure: SICAV - Part 1 Luxembourg 2002 Law (UCITS)	ISIN D Class: LU0651985177	Price per share D Class: EUR 1.2516
Minimum investment: Share classes A, B, C & D: USD 7,500 (EUR equivalent)	Subscriptions / redemptions: daily	Investment timeframe: 3 years +

Investment objective

The portfolio will be biased to investments in Europe, but could also hold investments outside this region. The portfolio aims to provide a balance between capital preservation and capital growth in euros with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Please refer to the Prospectus for full details of the fund, its charges, the investment objective and investment policy.

■ Manager commentary

Events in June, prior to the UK's EU referendum on the 23rd, became somewhat irrelevant following the shock result. The market reaction was instant and dramatic, with sharp falls in sterling, global stock markets, government bond yields (especially those in the UK) and a flight to safe haven assets such as gold. In the UK, domestically exposed companies such as banks, house builders and retailers have fallen particularly steeply. However, the moves were less violent than predictions prior to the vote, and after two days of declines markets recovered as prospects of a global contagion, systemic illiquidity or funding problems for banks became less tangible. By month-end the UK equity market was higher than its pre-referendum level and up 5.0% in June in sterling terms, while US equities were marginally higher over the month (+0.2%). Emerging markets also had a strong month, up 3.5%, but Europe and Japan suffered significant falls in local currency terms, down by 4.6% and 9.8% respectively.

The Harmony Europe Diversified Fund returned -2.4% in June in euro terms net of fees, compared to a 4.6% decline for the MSCI Europe ex UK equity index. Over three months and year to date the Fund has gained 0.4% and -2.3% respectively. The main contribution to returns over the last month came from the fixed income portion of the Fund, with our hard currency emerging market bond holding gaining 3.9% and our US investment grade credit holding up by 2.3%. US high yield bond positions made a small positive contribution. Strong performance from interest rate sensitive investments was also reflected in the listed real estate and listed infrastructure sectors, with the Blackrock Real Estate and First State Infrastructure holdings gaining 3.8% and 3.2% respectively. The fund's exposure to gold producing businesses (via an iShares ETF) made a meaningful contribution to performance despite a small position size, given a very strong return of 22% over the month. Exposure to this sector also benefited our holding in the Kopernik Global Equity fund, which outperformed the MSCI World index by almost 10%. Meanwhile our Dimensional holding, which provides value orientated exposure to emerging market equities, returned 5.7%. However, these contributions to performance were more than offset by declines from the Fund's equity holdings. The main detractors were among our European equity holdings, reflecting sharp declines in markets towards the end of the month as well as some underperformance from our selected managers versus their respective benchmarks. However, in most cases such benchmark comparisons are misleading over this particular period as the performance of underlying holdings is underestimated. This is due to a very sharp rally in markets on the afternoon of the last day of the month, which was captured by market indices but not by most fund holdings as they typically calculate their prices earlier in the day. As a result the fund performed well on the first day of July as the underlying pricing caught up with benchmark indices.

Given the high profile closures of several UK property funds during July, it is worth highlighting that the Harmony funds have no exposure to open ended funds investing in direct property because of the obvious liquidity mismatch risks they suffer. Instead we obtain property exposure via global portfolios of listed property securities (mostly REITs) and in the Sterling funds we also have a holding in the Ediston Property Investment Company, a London listed closed ended investment trust.

We strongly believe that the UK will thrive and prosper in the long term whether in or out of the EU. In the shorter term, the inevitable rise in uncertainty will push the risk premium on UK and European assets higher, with the latter facing the additional risk of a weak banking system. Financial market volatility will increase until there is some degree of clarity on how Brexit will unfold, but we believe the likely outcome will be broadly market friendly. We are therefore seeking to use periods of weakness to accumulate assets on more attractive longer term valuations; being patient in this way should help reduce fund drawdowns and ultimately boost returns over time. Furthermore, with global policymakers likely to lean towards more monetary and fiscal accommodation in response to the renewed global growth risks, there should be ongoing support for financial assets going forward.
