

Harmony US Dollar Balanced Fund (Class E)

Fund details

Investment manager: Momentum Global Investment Management	ISIN: LU0795381242
Currency: USD	Price per share: USD 1.1353
Inception date (fund): 12 August 2011	Minimum investment: USD 250,000
Structure: SICAV - Part 1 Luxembourg 2002 Law (UCITS)	Subscriptions / redemptions: daily
Peer group source: Bloomberg¹	Investment timeframe: 3 years +

Investment objective

The portfolio will be biased to investments in the United States, but could also hold investments outside this country. The portfolio aims to provide a balance between capital preservation and capital growth in US dollars with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Please refer to the Prospectus for full details of the fund, its charges, the investment objective and investment policy.

Fund performance

Cumulative returns

Investment statistics (since 1 January 2009)

Current month return:	0.9%
Cumulative return:	51.9%
Annualised return:	8.7%
Annualised volatility:	7.5%

Regional allocation

Asset allocation

Currency allocation

Sources: Momentum Global Investment Management, JP Morgan Bank (Luxembourg) S.A., Bloomberg.

¹ The peer group median is a composite of (i) global peers and (ii) local peers, in the ratio 1:2. The return of the global peer group each month receives a weight of one-third, and this is added to the return of the local peer group which receives a weight of two-thirds; together these two numbers produce a single composite peer group return. This weighting methodology is consistent with the "normal" asset allocation of the Fund, with a two-thirds bias towards "home" country assets and currencies.

■ Manager commentary

The final month of 2013 brought with it a continuation of the main theme of the year, namely positive returns for equities and a negative month for global government debt. The Harmony US Dollar Balanced Fund returned 0.9% in December. For the calendar year the Fund has returned 11.1% net of all fees. The US Treasury bond market returned -1.1% in December, while the country's stocks returned 2.5% in USD terms. The Fund's asset allocation policy had a positive impact on absolute and relative returns last month, with our decision to avoid government bonds in favour of various aspects of the credit markets benefitting performance as these assets in aggregate outperformed sovereign paper. While the Fund is neutral to global equity, the small overweight to global emerging markets equity detracted from performance. Furthermore, the Fund is overweight cash which proved to be a store of value in a month where global government bonds sold off. Finally the decision to underweight global property securities aided relative performance as these underperformed the broader equity market.

Going forward, with uncertainty remaining over the strength of developed and developing world economic growth combined with the potential for tightening credit conditions, investors should look to retain a prudent level of diversification in their portfolios. Overall, we believe that the Fund is well positioned to take advantage of future opportunities in the markets as they present themselves. The past year was notable for its low levels of volatility in the markets. We do not believe this to be sustainable over the longer term and as a consequence we expect volatility to increase. It is important to bear in mind that while occasionally uncomfortable, volatility provides valuation opportunities for disciplined investors and our overweight cash position provides a ready source of liquidity which can be invested in opportunities as and when they arise.

From a manager selection perspective, our US equity managers struggled to keep up with the sharply rising market in the fourth quarter as the S&P 500 index gained 10.3% in US dollar terms. In comparison, our fund holdings managed by Harris, Wells and Yacktman, returned 9.1%, 7.6% and 6.6% respectively. Nonetheless, over the full year these funds have on the whole performed very well in relative terms despite the market rising by over 30%. Both Wells and Harris returned over 30.0% as their respective value and growth investment styles were both rewarded over the period. Yacktman underperformed for the year with a return of 25.9% although this was to be expected somewhat; the manager's quality biased approach is inherently conservative and so is likely to lag in such sharply rising markets and their higher than average cash holding has also been a drag on returns.
