<sup>1</sup> The peer group median return is a composite of (i) global peers and (ii) local peers, in the ratio 1:2. This weighting methodology is consistent with the "normal" asset allocation of the Fund, with a two-thirds bias towards "home" country assets and currencies.

## ■ Manager commentary

---

The Harmony US Dollar Growth fund rose 0.8% in November in US dollar terms net of fees and has gained 5.3% year to date. Although the US equity market delivered a strong gain of 3.6% over the month, a combination of US dollar strength and rising bond yields led to negative dollar returns for most other asset classes that the Fund is invested in. However, fund performance was supported by our asset allocation policy within fixed income and manager selection within US equities. The fixed income portion of the Fund is predominantly invested across various segments of the corporate bond markets. In all cases our selected holdings outperformed the -4.4% return of the global government bond index, even achieving positive returns in the case of our convertible and US high yield holdings, despite a challenging backdrop of steepening yield curves. The only fixed income holding outside of corporate bonds is in hard currency emerging market bonds, which returned -4.5% over the month, but the position size of approximately 2% meant that the negative impact was small. Meanwhile, the Fund's US equity holdings outperformed in aggregate driven by strong returns from the value orientated managers Lyrical and Vulcan, whose strategies returned 10.1% and 6.9% respectively, as well as Granahan's small-cap growth strategy, which returned 4.4%.

Three new holdings were added to the Fund during November: two liquid alternatives funds and a position in gold. We believe adding these liquid alternatives and gold holdings will enhance both the risk and return profiles of the Harmony funds.

We now have small positions across three liquid alternative funds, in order to benefit from a well-diversified blend of alternative strategies. The current allocation of 4.5% may increase from here if we identify other funds to invest in, but the overall sizing will depend on valuations in other asset classes and is unlikely to exceed 10%. Two of the strategies, managed by F&C and Goldman Sachs, focus on systematically harnessing style risk premia within equity markets. These are additional premia observed for taking on particular equity risk over and above what you would expect from the market as a whole and the idiosyncratic risk inherent within each individual stock. The third fund, managed by Goldman Sachs Asset Management (GSAM) is a macro orientated strategy which is diversified across several underlying sleeves with different return drivers including interest rates, emerging market debt, currencies and mortgages. The sleeves are managed by specialist teams and are combined according to a robust and disciplined investment and risk management process. All three of these funds are managed to provide a market neutral exposure, meaning returns have very little sensitivity to equity and credit markets.

We introduced a small position in physical gold bullion via an exchange traded security managed by ETF Securities. Units held in this security are fully backed by physical gold holdings. We do not forecast an expected return for the gold price in the same way that we do for other asset classes, in large part due to it not producing any form of yield, but history provides a very good guide as to how the gold price performs in different environments. In particular gold tends to deliver strong returns during periods of sharp equity market drawdowns and high inflation. Given the bulk of the funds will remain invested in equity markets, these characteristics of gold complement that exposure well and help to make the funds more robust and well balanced. Also, although the world has faced strong deflationary forces in recent years, a return to inflation should not be ruled out and gold has a proven ability to preserve purchasing power over the very long term.

## ■ Important Information

---

The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. Past performance is not a guide to future performance. Performance is calculated on a total return basis, net of all fees.

This document does not provide all the facts needed to make an informed investment decision. Prior to investing, investors should read the Key Investor Information Document (KIID) and seek professional investment advice where appropriate.

Harmony Portfolios are sub-funds of the Momentum Global Funds SICAV, which is domiciled in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier. The fund conforms to the requirements of the European UCITS Directive.

Performance figures prior to the inception date of the Class E share have been simulated to show its lower fees by adjusting the Harmony US Dollar Growth Fund Class A share's past performance. Prior to the Class A fund's inception as a sub fund of the Momentum Global Funds SICAV on 12 August 2011, the fund was managed as the Harmony US Dollar Growth Incorporated Cell (IC) within the Momentum Mutual Fund. The historical performance of the Harmony US Dollar Growth IC Class A fund is shown from 1 January 2009 until the inception date of the SICAV.
