Minimum investment: <b>Share classes A, B, C &amp; D: USD 7,500</b>	Subscriptions / redemptions: <b>daily</b>	Momentum Global Funds AUM: <b>USD 599.0 million</b>
Investment timeframe: <b>5 years +</b>	Website: <b>harmonyportfolios.com</b>	US Dollar Growth Fund AUM: <b>USD 127.4 million</b>

## Investment objective

The portfolio will be biased to investments in the United States, but could also hold investments outside this country. The investment objective is to provide capital growth in US dollar terms but with a reduced level of volatility, via strategic exposures to a wide range of asset classes.

Please refer to the Prospectus for full details of the fund, its charges, the investment objective and investment policy.

## Fund performance

## Cumulative returns (since inception, 12 August 2011)

S&P 500 Put Option 31/Oct/2017	Options	0.1%

## ■ Manager commentary

We purchased a small position in at-the-money put options on the S&P 500 during May. The options we purchased will expire at the end of October, at which point their pay-outs will be based on the level of the S&P 500 index relative to when we purchased the options. If the index is lower at the expiry date then the pay-out will be positive, otherwise the options will expire worthless. We initiated the position on the basis that these options offer cheap protection at a time when markets generally appear somewhat complacent, partly evidenced by very low implied volatility (which itself results in option prices being much lower than usual). We believe the current bull market in equities has further to run and so we are reluctant to reduce equity exposure, but there is a reasonable chance that markets may experience a correction before too long. Furthermore, US equity market valuations are relatively high and the S&P 500 options market is one of the most liquid in the world; additional factors that make this an appealing, low-cost protection strategy.

We also added a new strategy within the global convertible bond allocation, managed by Ferox Capital, initially at a very small weight but this has been increased to a more meaningful position during June. Ferox Capital focus exclusively on managing global convertible bond mandates and manage \$1.6bn across four long only and absolute return strategies. The firm is owned by three founding partners who set up the business in 2000 after having worked together at JP Morgan. The investment team consists of ten people with combined experience of over 160 years, making it one of the best resourced and most experienced convertible bond teams globally. The 'Chinook' strategy we have invested in was launched in 2016 following extensive research and preparation; it is a systematic, rules-based strategy that aims to provide a balanced and well diversified exposure to global convertible bonds. The investment process focuses on building a portfolio of 50-100 relatively cheap bonds that display strong upside optionality and limited downside risk.
